New A-4 (USA) Size 8vo.Q: Using WCF services to store/retrieve data in ASP.NET MVC3 I want to use WCF services to store data in my ASP.NET MVC3 app. In this app, I have multiple users and each user can add data to the system. The basic model for the data is something like this: [Serializable] public class UserData { public UserData() { } [Key] [DatabaseGeneratedAttribute(DatabaseGeneratedOption.Identity)] public long Id { get; set; } [Required] [StringLength(50)] public string Username { get; set; } ... } The objective of the system is to allow a user to add data when he logs in, and retrieve data when he logs out. I can add data in this way using ASP.NET MVC3: [AcceptVerbs(HttpVerbs.Get)] public ActionResult AddData(string username) { ... var data = new UserData { ... }; ... db.UserDatas.Add(data); db.SaveChanges(); return RedirectToAction("Index"); } If I was using a database, this would d4474df7b8
