Install MapSource 6.16.3 EXE. Mar 26, 2015 Please help. I want to have Mapsource 6.16.3 patched but my Garmin GPS is not connecting to MapSource 6.16.3 Patched. Mapsource software version 6.16.3 - Patched. Garmin Canada MapSource. Garmin MapSource. Download the Garmin MapSource software from Garmin. Download mapsource 6.16.3. as of October 25, 2010. MapSource software version 6.16.3 - Patched. - Download Garmin MapSource.Q: jquery show/hide spinner gif I am having an issue getting the spinner gif to show. I have managed to make the gif go away when I click the close button, but it doesn't show up at all when it is supposed to (before and after the form is submitted). I have tried jquery.ui.effect.spinner and jquery.effect.spinner. I'm using Drupal 6. The.gif is located in a folder that includes the following files:  
../img/default/spinner.gif ../js/jquery-1.4.2.min.js ../js/jquery.effects-1.2.0.min.js How would I go about getting this to show?  
A: When the jQuery spinner is applied to an input element, jQuery will normally place a label for it over the input. That label is a sibling of the input, and so you don't need to position the spinner div to be a sibling of the form. Instead, place it in a div that is a sibling of the form. A: Make sure you are using 1.4.2, there was a bug in 1.4.1 and earlier that removed the.show() and.hide() methods UPDATE: a better question would be why isn't it showing? Are you calling.show() and.hide() on the correct element? FYI, Spinner is a plug-in. There are two effects plugins in 1.2.0 (jquery.ui.effect) and (jquery.effect.spinner) Q: View can't see controls in another user control I have a page called Parent.aspx, in this I have a User Control named Child.asc 2d92ce491b
