This plugin creates keymacros that allow "OSD" to appear on the screen. Activate OSD This plugin creates keymacros that activate "OSD" on the screen. It is required for playing media where "OSD" is not available. It will work in combination with other plugins or scripts that create keymacros. Add OSD media This plugin creates keymacros that add media to the OSD. Remove OSD media This plugin creates keymacros that removes media from the OSD. Get OSD This plugin creates keymacros that returns the position of the OSD (without going into Full Screen). Set OSD This plugin creates keymacros that sets the position of the OSD. It is used to set the position of the OSD after it has been moved by other plugins. Get volume This plugin creates keymacros that returns the volume of the media. Change volume This plugin creates keymacros that changes the volume. Play media This plugin creates keymacros that plays media in the OSD. It is used for "Play media" links. It is not compatible with "Media list" and "Media list with repeat playback". Pause media This plugin creates keymacros that pauses media in the OSD. It is used for "Pause media" links. It is not compatible with "Play media" and "Stop media". Stop media This plugin creates keymacros that stops media in the OSD. It is used for "Stop media" links. It is not compatible with "Play media" and "Pause media". Restart media This plugin creates keymacros that restarts media in the OSD. It is used for "Restart media" links. It is not compatible with "Play media" and "Stop media". Increase volume This plugin creates keymacros that increases the volume. Decrease volume This plugin creates keymacros that decreases the volume. Toggle volume This plugin creates keymacros that turns the volume on and off. Toggle mute This plugin creates keymacros that turns the volume on and off and mutes the sound. Hide/Show OSD This plugin creates keymacros that hides and shows the OSD.
