So in this video we'll show you 5 simple strategies that you can use to make your password stronger. For more helpful tips, read: published:04 Mar 2015 views:3913 WE'VE MOVED! This video is available at UniversalPassword Scrambler: Password Generator Our graphic design & video production team are creating the largest video library on the planet for you! This is the original video, titled 'StrongPasswords: The Strength of Character vs. the Security of Numbers', published:11 Dec 2012 views:17088 Back in February, we described how to use open-source tools to crack passwords without a password dictionary. If you haven't seen it yet, the video lays out how to use John the Ripper to crack passwords and the Password Gorilla... published:26 Aug 2017 views:613 Hi, my name is Michael and this week we're going to show you how to take advantage of two free and open source tools called John the Ripper and Password Gorilla to crack passwords with ease. So in this video, we're going to go around our own internet connection in search of a password manager's database and see what we can find. So, there you have it. We've easily found a database containing over half a million usernames with their corresponding passwords that we can now use with John the Ripper, as well as Password Gorilla. There's no way to tell how many usernames are in the database but we can see that almost all of them have an excel file attached to them. And that's enough for right now. Tomorrow we'll download that file and start our attack on a whole new set of passwords. It's 77a5ca646e

What's New In LongPass?

================== Create secure passwords by typing two simple words LongPass generates strong passwords by repeatedly typing two words in random order into the passcode input box. This way you don't have to remember a long password, which might be a security risk for your account. Note: This tool may not be appropriate for all accounts. What's New: ============ Version 2.0 -- Features and changes: -------------------- The installation folder now has full package encryption. Passphrases and passcodes are case sensitive. How to install LongPass: ------------------------ To install LongPass, you need to download and unzip it first. Now run the setup.exe file, choose "I accept" on the license agreement dialog, then allow the application to install. When the installation is finished, you can now start the application by running it from the Start Menu.Q: Using Google App Engine to manage a S3 bucket I have a GCP instance with access to Google Cloud Storage. My plan is to use it to store images in S3 and to access those images using a web app I'm building on App Engine. Since I'm planning on creating a bucket in S3, I wanted to know if there was a way to use Google App Engine to manage that bucket. A: Your AppEngine app (of course) will talk to the S3 service and will provide the appengine instance with access to your bucket. AppEngine can't manage your S3 bucket as that is a GCS service, but AppEngine can give you access to GCS for anything you want. You should also note that AppEngine app instances are ephemeral in nature. If you scale up your app, then you should give some thought to how to handle your bucket on a per instance basis. For a bit more detail on this, see 12th June 2017 Storm supercell erupts in US midwest Only the fifth supercell of this size recorded in the United States, and the first to threaten lives. In the early hours of 12th June, a powerful supercell system spawned a thunderstorm that produced destructive winds up to 180 kilometres per hour, a storm so strong it was named Tornado Dean. Dean formed over the central US plains, in the state of Oklahoma, and tracked westwards. It was one of the largest supercell storms ever recorded in the United States, and was only the fifth of this size recorded in the country. However, the destructive force of this storm did not go unnoticed. During the course of the storm, dozens of tornado warnings were issued, and several dozen tornadoes were confirmed, including one that,
