The Journal

The Journal Serial Key is a note taking application that can quickly organize information, tasks, and upcoming events. You can add a note by pressing the letter "T" or a task by clicking the circled number, note a location or task by selecting a check box, and then insert formatted text and attachments. The Journal can then be exported as a text or CSV file. Image Packages Bit of a tweaker. Needs a little touch up from time to time. Great for photo editing, especially "fixing" old photos for use on Facebook. Not much more than a photo editor, but definitely fun to play with. You can download a free trial for a limited time and see if it's for you. Acquired it from a friend after playing with it, has been on my computer for a while, I did run it through the WU, worked great. Bit of a tweaker. Needs a little touch up from time to time. Awesome app. Great for jotting down ideas before they are forgotten and for showing off your new album to your friends and family. It's also really well designed and very easy to use. I highly recommend it. New Delhi: Rahul Gandhi has been a soul mate for a lot of Congress supporters - in the sense that he is leading the party with such a placid but stern face that the common man could relate to him and his antics that the party could not. But he has a thick skin. And he has slowly been rising through the ranks despite of many in the party quitting and joining his mother Sonia Gandhi's growing army of supporters. This is the same Rahul Gandhi who walks in an autumnal forest and comes back with an armful of those colourful oranges that have more to do with the festival of colours than a harvest. He is a nice guy, who believes in doing good

things and takes what he does seriously. But he is a well-read guy with a high IQ and is way more articulate than you may think of him. He is a thinking man's man but the BJP has been bringing him down to earth with their often unsavoury antics. And he has started showing it back to them. Rahul is a man with a lot of learning.
