Features: * This version includes new features. * This version of IceLayout Builder is designed to replace the "Layout Designer" which is currently included in the application. We are so excited! Following a year of intensive research and development, we are happy to release our first project of the next Neurocity® V1 platform: Neurocity® V1.0 is a great start for a premium version of Neurocity® V1. With every update, we will be adding features to expand the possibilities to create the kind of immersive experiences

that can be achieved with Neurocity®. Check out the first Neurocity® V1.0 in the Neurocity® Store. With your support we aim to deliver the best beta experience for both the customers and our developers by offering the immediate release of experimental alpha V1.0 on a very limited pre-sale basis to selected beta testers. Neurocity® V1.0 will include the following key features: New platform: Neurocity® V1.0. New Platform: Easily upgrade Neurocity® from V1 to V1.0 and seamlessly run your studies between the platform versions. Virtual reality (VR): Immerse your users in a deeper level of Neurocity® immersion thanks to a great user experience for displaying visual stimuli in the VR environment. Procedural generation: Access the advanced procedural generation system to create your own ‘off-the-shelf’ modules at your convenience and try out new behaviors in the realtime environment. Neurology: The introduction of the Human Brain Model that is built into the Neurocity® engine. Dates: The beta testing program will start in mid-October. (About
