Figure 1-3. This example shows how to use the Lens Correction filter. \* \*\*Creating a new layer\*\* . You need a new layer for any effect or adjustment that you do. You can create a new layer directly in Photoshop, but it is easiest to create a new layer on a new file by creating a new file and merging the new layer into it. From the Merge Settings screen, select "Layer 1" (where 1 is the layer you want to merge). \* \*\*Adding a color filter\*\* . Color filters enable Photoshop to manipulate the colors in an image. Color filters are a big part of the expressive power of Photoshop. One of the most powerful Color Filter operations is the Lens Correction filter. For more on color filters and Lens Correction, see Color Filters. You can also use Adjustment Layers to alter the colors of a photo. Chapter 3 has more on Adjustment Layers. \* \*\*Using the Healing Brush\*\* . The Healing Brush enables the user to selectively color in or erase parts of an image. In
